Discussion was held on our two diesel generation plants, how often they are called to run, and the economics of each plant. It was determined that we should request a change of designation with NIMECA and Basin Electric for the East Generation Plant. By changing the designation to "Behind the Meter", LMPC will continue to operate the East Generation Plant as required to continue receiving capacity payments, however LMPC will not have to operate the East Generation Plant when we are called to run for reliability.

Discussion was held on AMI – Smart Meters that would replace all of our current electric meters with smart meters. Benefits include remote visibility of meters, customized alarms, no truck rolls to get meter readings, and to position the electric utility for future industry changes such as time of use rates. The Trustees reviewed two different proposals and did not take any action at this time as they would like more information.

There being no further business, the Chairman Pro Tem declared the meeting adjourned at 5:35 p.m.
